MONDAY, - - - - APRIL 6, 1896

A ROAD "out of the woods" would likely be a pleasing trail to some of the lawmakers.

AFTER their devotions of Good Friday and Easter the Legislators should "get in and do something."

It was proven at the Minister Show that all the comedians in the country are not before the people all the time.

Tax press is stopped to announce that the Social Evil Problem has not yet been solved. It is too bad it cannot be talked to death.

PRESIDENT DOLE's personal courage and rare presence of mind are again placed in evidence. He has yet unimpaired the same level head, coolness and calm nerve that were shown in the Queen Emma riot, in 1887 and in 1893.

BOTH license and tax committees seem to be somewhat at sea up to date, but will in all likelihood pick up correct bearings before the session ends. The gentlemen "on the job" are intelligent and earnest and are endeavoring to do the very best for all concerned. Besides, they have the helpful co-operation of a large number of able and honest citizens.

THIS is the day set for the marriage at New York of Hawaii's sure enough "Great and Good Friend" ex-President Harrison. The bride is Mrs. Dimmick, and the ceremony will be at St. Thomas church, the Rev. Dr. John Wesley Brown officiating. If there was a cable, Indian friends would certainly wire felicitations to the distinguished American soldier and statesman. The people will join with THE STAR in these congratulations.

THE RIOT.

For the first time of which there is any record a large number of Portuguese citizens have acted publicly in a manner unworthy the fair name of the colony and to be much regretted by its best members and true friends. On Sunday evening they fought the police and resisted the law of the land. It must not be allowed to occur again. The outbreak was in strange contrast to the orderly demonstration made ten days ago. On that occasion, though thoroughly imbued with the idea of creating an impression, of conveying thoughts of strength and numbers, the Portuguese were decorous as a convention of Quakers. On Sunday night, in the very presence of the Chief Executive of the country, some of these same men engaged in rioting. Perhaps there was not a little provocation, but they have hurt themselves and should have known better. If the sentiments given action at the disturbance are to grow there is local trouble ahead. For it is now well settled here that law and order are to be upheld at any cost and that police authority must be respected at all times and under all circumstances. The Republic, the people generally, the papers, have had a better opinion of the Punchbowl town residents. It is a pity anything should occur to force a modification of the good opinion. It is a pity that so many Portuguese names should at once appear upon the Station House register, where they are usually scarce enough. While there have been many times rows in that quarter of the city, never before has there been anything like this. Perhaps it would be well for the Legislative committee on the Portuguese petition to take up this matter. Let them look for the deepest impulses, the motives far back. Some extraordinary causes must have been at work to transform a people usually quiet and attentive to the law into a howling mob, mauling clubs, throwing stones and shouting defiance of the authority of the State, conduct which cannot and will not be tolerated. The committee could perhaps place responsibility for the agitation causing the unrest which made the fight against the police possible. As to making comment on a case pending at bar, THE STAR has no fears to govern or apologies to offer. There will be a hearing on merit in the District Court. If a few of the rioters are held they will ultimately go before a jury and get off lightly, if not scot free. Such affairs are always just that way, principally because lawyers are lawyers and the general run of men are made of very common clay.

WEDDED TO PROHIBITION.

(Hawaii.)
The doctrine that shall be taught in Kanehahua (College) is that prohibition of an evil, though not always altogether effective, as in the case of laws against theft, is always enlightened legislation.

Frank Shephardson, an engineer on the "Southern Pacific Ry.," who resides at Los Angeles, Cal., was troubled with rheumatism for a long time. He was treated by seven (7) physicians, also visited the Hot Springs, but received no permanent relief until he used Chamberlain's Pain Balm. He says it is the best medicine in the world for rheumatism. For sale by all druggists and Dealers—Benson Smith & Co., Agents for H. L.

Timely Topics.

April 6, 1896.

Six rules of health.—The secret of health and long life, says Dr. F. J. (Hawaii), New York, April 15, lies in the following very simple things:
"1. Breathe fresh air day and night.
"2. Take sufficient sleep and rest.
"3. Work like a man, but never overwork.
"4. Avoid passion and excitement.
"5. Do not strive to take the whole world on your shoulders—trust in your good destiny.
"6. Never despair. Lost hope is a mortal malady."

The writer of the above lines was undoubtedly fair in his estimate of what constituted "The secret of health and long life," but had he been in Hawaii when he wrote these rules he would have included a seventh one to the effect: Do not drink water that has not been filtered.

Tourists and others who are constantly traveling make it a point to carry lemon tablets to be dissolved in the water before drinking, inasmuch as the frequent change of water is found to be anything but beneficial to their health. Travelers in the extreme southern countries, such as India, carry a companion a medicine case with such preparations as will ward off sudden attacks of chills, or malarial fevers.

All this is very nice to have in the house to use in an emergency, but if the above rules, and especially the appended seventh, are strictly adhered to there will be less occasion to resort to the medicine case.

Six months ago Honolulu as well as the islands were in an intense state of excitement by the announcement in the daily papers that cholera had appeared.

The Board of Health was in a peculiar position as they had to cope with a plague that they were not familiar with, and by the people not having sufficient confidence in them to listen to their decrees. They realized their position and the difficulties that would have to be surmounted, namely: people who would not pay attention to their instructions, deliberately broke the tabus and last and the most important of all the inadequate sewerage.

It was thoroughly demonstrated that persons contracted the disease, if you can call it such, by coming in direct contact with those affected—that the germs were in certain vegetable and animal foods that you ate and in the water you drank.

In countries where frost is unknown malarial fever germs are constantly being generated and it behooves people to be exceptionally cautious of their method of living, and of the water that they drink as the malarial fever germs are in the water.

The heavy rains that we have experienced in the last few weeks have played havoc with the water by making it muddy and impure. The physicians of the Board of Health recommend that all drinking water be boiled, but we recommend you to boil and filter it by using an IMPROVED STONE FILTER.

You can boil it if you wish, but the mere fact of boiling it does not do away with the germs. If the water is insufficiently boiled the germs are not killed they remain in the water and pass into the body. The results of drinking insufficiently boiled, or even thoroughly boiled water are too plain to need any further comment.

Take the water that has been boiled, hold it to the light and you will see the sediment, but let the same water pass through an IMPROVED STONE FILTER, examine it and you will find it clear as crystal.

A filter that is built for what it is intended, cannot half filter the water, it either does the work or something is radically wrong in the construction. If the latter is the case no matter how many times the water passes through the filter the water will remain impure, while if the filter is properly constructed it does the work at one filtering.

The IMPROVED STONE FILTERS are easily cleaned, and never become cracked or crazed by change of temperature of the water.

The filtering medium is natural stone mined from the earth and is unlike any other stone in that it does not absorb or become foul. Impurities never penetrate it, but lies on the surface and internally the stone remains as pure and white after years of use as when taken from the mine. "Forewarned is forearmed" the summer weather will soon be here, do not wait until it is upon you before purchasing an IMPROVED STONE FILTER as it is needful at all times.

THE HAWAIIAN HARDWARE COMPANY.
FORT ST., Opp. Spreckel's Bank

W.W. DIMOND'S

It is the unusual that happens and no bright woman wonders when some usual store attempts to sell a second quality article at lessened prices. She will wonder why the store even owned such stuff.

But when the unusual store offers great lots of first quality of Agate ware at prices which should be half as much more it sets the town to talking—and coming for the goods. This is the story of our Agate ware. Money pressure comes to great houses as well as small. We took advantage of the over stock of the great manufacturers, and a turning over of the stock meant more than the great loss counted for. You are getting the advantage of it as we did. You never saw such Agate ware in your life at the money—no chipping; the enamel is put on to stay and the price is just what you have been paying for second quality.

We have every article that is made in Agate ware—too large an assortment to put in one news item.

We've Tin ware also.

Mr. W. W. Dimond.

BENSON, SMITH & CO.

We have some new Soaps, Perfumes and Toilet Articles from the firm of Colgate & Company, New York, and the best of it is they are American make.

Fort and Hotel Streets.

New Restaurant.
Near Post Office.

Iwakami.
Nothing which we have heretofore sold has given the satisfaction that "Sequah's Oil" and Cure has given for the treatment of this common complaint rheumatism. Sequah's medicines have established for themselves a reputation which is remarkable. Hundreds of afflicted people have been cured of rheumatism by using these remedies. The Oil will relieve the pain, sometimes in almost a magical manner. The Cure is recommended for driving the impurities out of the blood; which causes rheumatism, and as long as the blood remains impure, attacks of rheumatism will occur. It will pay any one troubled with rheumatism to give these remedies a thorough trial because they have cured others and therefore you are most likely to derive benefit from them. Try them now. Get them of

Wheels Have Gone Up.

COLUMBIAN IN A FIRE.

Destruction of Wheels in the Pope Building.

BOSTON, March 13. — The Pope Manufacturing Company's building was completely gutted by fire shortly before 4 o'clock today.

The block was a five-story structure of brick, profusely ornamented with terra cotta trimmings.

The contents, which were ruined, consisted of 1700 new bicycles, 175 second hand wheels and about 20,000 pieces of bicycle fittings, besides several thousand tires.

The Pope Company has a total loss on its stock and fixtures conservatively estimated at \$150,000 and \$200,000, on the building. The loss is covered by insurance.

The above shows that a good many wheels have gone up in smoke but that does not mean that they have gone up in price, or that we will not be able to furnish you with a wheel, for our 1896 stock is complete, and we have plenty of wheels to sell, though not "to burn."

When you come to us you have "Columbias," "Ramblers," "Stearns," "Pierce" and "Hartfords" to pick from, and with such a choice you are bound to be suited, but if you are not, buy a "Perkins," that is a wheel that will go around in a dead calm, even if you don't move a leg.

Call and examine our Stock.
